Timeline and Timebook Features

- MyHeritage has just released two new features - a Timeline showing your family's history, and an automatically created beautiful book with key data about your close relatives and lots of photos that we call Timebook.
- The genealogy Timeline allows you to view **all of your family's history in a single continuum** - however far back it goes. It lists the usual facts - births, marriages, and so on - but can show you much more besides. For example, if you have any photos, video files, documents, or special events, those will be viewable from the Timeline. So if you've got wedding videos and photos on your family site, you'll be able to see them in the Timeline. The Timeline also offers different layers of presentation: you can zoom out and see the most salient events in your family's history over the last century; or you can drill down to see the specifics of just one particular decade. This feature was developed together with the startup [AllofMe](#), a team of experts in Timeline systems, and we're extremely glad to be showcasing it on MyHeritage.
